

SAVVY®

PREMIUM

MAPP18461

Deliver consistent,
cost-effective, clean
spring weed control...

Product Summary

- Savvy Premium is a water dispersible granule containing 200g/kg metsulfuron-methyl.
 - A sulphonylurea herbicide for the control of weeds in crops: Barley, Oats, Triticale, Wheat, Green cover on land not being used for crop production.
 - Pack size: 240g.
 - Rate of Use: 30g/ha.
 - Water Volume: 100–200l/ha.
 - Application Timing: 15 March-BBCH39 (flag leaf sheath extension).
- Buffer zone: Five metres to the top of a bank of a static or flowing water body or one metre to the top of a ditch which is dry at the time of application. A Local Environment Risk Assessment for Pesticides (LERAP) may permit a narrower buffer zone.

TANK-MIX

Savvy Premium is compatible with a wide range of tank mix partners in general use. Ongoing studies continually update information to support tank mix flexibility.

The tank mixes shown below have been tested for physical compatibility with Savvy Premium at full label rates of use. Label recommendations of partner products must be observed.

Agitation must be used throughout, from mixing to application. Best practice is to spray immediately after mixing. Trace elements should be the last component added to the mix.

Results are taken from laboratory tests of the physical compatibility of tank mixtures, as devised by the Agronomy and Applications Sub Group (BAA) and approved by the Regulatory Affairs committee (1986). Do not tank mix Cerone or Terpal. Allow 7 day interval between ethephon and SU. Do not tank mix manganese and a hormone herbicide with SU.
